Academic Projects:
Title:WIFI-GREEN SWORD CUTTER USING IOT
Project Description:

This project presents the development of a novel IoT-enabled movable grass cutter system that incorporates real-time camera access and remote control capabilities through a smartphone application. The primary objective of this project is to enhance the convenience and efficiency of grass cutter maintenance processes and to help the farmers. The system comprises a grass cutter equipped with IoT modules, including sensors Arduino UNO microcontroller board as the main controller of the system, a camera for real-time monitoring, and actuators for controlling the movement of the cutter, a NODE MCU for Wi-Fi connection, linear blades for cutting the grass, and a motor driver module for the wheels of the Robot as well as for blades. The real-time camera feed allows users to monitor the cutting progress remotely and ensure precise operation.
